## SUMMARY

Flutter Developer with hands-on experience delivering 3+ production-ready Flutter applications using Flutter and Dart. Strong in responsive UI, REST API integration, and state management (Riverpod, Provider, Bloc). Implemented JWT-based authentication, local storage, and real-world features across apps used by hundreds of users. Focused on learning fast, writing clean code, and contributing effectively to product teams.

## EXPERIENCE

### Flutter Developer

Zabihaty LLC

May 2023 – December 2025, USA Remote

- Developed and maintained 3 cross-platform Flutter applications with shared codebases
- Implemented 90+ UI screens from Figma with responsive layouts for multiple device sizes
- Integrated 15+ REST API endpoints for authentication, product data, orders, and notifications
- Applied Riverpod, Provider, and Bloc to manage state across 10+ feature modules
- Resolved 30+ bugs related to UI, API handling, and state inconsistencies
- Improved screen load consistency and navigation flow through refactoring and optimization

### Flutter Developer

UIU Developers Hub

February 2024 – present, United International University

- Collaborated in a 5–6 member developer team on Flutter-based academic and demo projects
- Built multiple feature modules using widgets, navigation, and basic state management
- Used Git-based workflows for version control, pull requests, and peer reviews

### Flutter Developer (Freelance - Top Rated)

Upwork

September 2019 – Present, Remote

- Delivered 5+ Flutter applications/features for international clients
- Implemented JWT authentication, API integration, and real-time updates
- Maintained 100% client delivery completion with clean, documented code

### Instructor & Content Creator

YouTube

May 2025 – Present, Bangladesh

- Created 15+ Flutter tutorial videos covering widgets, state management, and app structure
- Explained beginner-to-intermediate Flutter concepts to hundreds of learners

## PROJECT

### Zabihaty – E-Commerce & Event Catering App

Flutter | Riverpod | REST APIs | JWT | Dio | Session Management (Refresh-Token) | Clean-Architechture

<https://play.google.com/store/apps/details?id=com.zabihaty.app.zabihaty>

## EDUCATION

### B.Sc, Computer Science and Engineering

United International University · Dhaka, Bangladesh

## AWARDS

1<sup>st</sup> Runner-Up — National Signature Hackathon (2025)

7<sup>th</sup> Place - IUT Hackathon 2025

Finalist — National Collegiate Programming Contest (NCPC 2023)

Champion (District) — National Science & Technology Week (2020)

4<sup>th</sup> Place - IUT Hackathon - 2024

District 2nd Champion — National Science & Technology Week (2021)

## SKILLS

Flutter & Dart • Responsive UI & Navigation • State Management (Riverpod, Provider, Bloc/Cubit) • Backend Integration (REST APIs, JSON, Dio) • Authentication & Storage (JWT, flutter\_secure\_storage, Hive, SharedPreferences) • Local Databases (SQLite, Drift—basic) • Best Practices (Clean Code, Clean Architecture, Error Handling) • Tools (Git, Postman, Figma)
